HTML5, CSS3, JavaScript (ES6+), Phoenix LiveView, React, Next.js, TailwindCSS

Back-End

Elixir, Phoenix, Node.js, RESTful APIs, GraphQL, JMix

Databases

PostgreSQL, MySQL

ORMs: Ecto, Knex

Build / Platform / DevOps

Maven, WildFly, Git, GitHub/GitLab, CircleCI, Azure, Zoho (CRM / Desk)

SEO & Tracking

Technical SEO, metadata optimization, performance optimization, JSON-LD (structured data), Google Tag Manager, Google / Facebook / TikTok Pixels, Skroutz, BestPrice

Testing & Tooling

Cypress, Postman, Figma, Jira

Professional Experience

Netmechanics S.A. — Front-End Developer *Apr 2024 – Present*

- Lead front-end development across multiple enterprise e-commerce projects using **Velocity-based themes** on **Maven/WildFly** infrastructure.

- Delivered and maintained **React and Next.js** applications (ticketing, booking, e-commerce) with production-grade performance and SEO-first architecture.
- Implemented **technical SEO, structured data (JSON-LD)**, and full analytics/pixel integrations (GTM, Google, Facebook, TikTok, Skroutz, BestPrice).
- Built and optimized responsive websites serving **14k+ monthly visitors**, focusing on performance, accessibility, and conversion.
- Converted Figma designs into maintainable, accessible (**WCAG-compliant**) production code.
- Integrated engagement and conversion features (popups, PDF viewers, custom tracking events).
- Mentored and onboarded junior developers.
- resolved critical production issues under tight deadlines.
- Collaborated with marketing and operations teams using **Zoho CRM** to support campaign workflows, lead tracking, and analytics alignment.

Blinq — External Front-End Partner *Apr 2025*

- Designed and refined the UI of a booking application.
- Migrated Adobe XD designs into **Elixir Phoenix LiveView**, enabling real-time interactivity and improved UX consistency.

Outy B.V. — Full-Stack Developer (Remote) *Jun 2023 – Jan 2024*

- Designed and developed a promotional website from Figma using **Hugo** with custom HTML/CSS/JS.
- Implemented DOM-level customizations for pixel-perfect delivery.
- Expanded **Cypress end-to-end test coverage**, improving reliability across critical flows.

Contractuali GmbH — Back-End Developer (Remote) *Oct 2022 – Jun 2023*

- Engineered a secure, scalable **Elixir/PostgreSQL** backend for a contract management platform.
- Built REST APIs with **JWT authentication** and complex multi-transaction workflows.
- Automated email notifications and generated dynamic PDFs for contract lifecycle stages.
- Integrated **eIDAS-compliant electronic signatures**.
- Achieved **92% automated test coverage**.

ASCE.gr — Software Engineer (Side Project) *Nov 2020 – Present*

- Core contributor to a **P.E.T.A.L-stack** e-commerce application.
- Participated in strategic planning, feature development, and production maintenance.
- Delivered custom promotional pages.
- Maintained a high percentage of test coverage.

E-Shop.gr / VFS Logistics — Store Manager *Jun 2011 – Oct 2022*

- Managed branch operations and logistics across three islands.
 - Drove **60% annual growth** through client retention and data-driven decisions.
 - Built internal digital tools for reporting and operational efficiency.
-

Open Source

- **Elixir School Contributor** — Maintained Greek translations and implemented a language toggle feature.
-

Education

Computer Engineering

University of Thessaly, Lamia, Greece
